

Job Description – Air Emissions Team Leaders and Technicians

Fitz Scientific are a fast growing monitoring and testing business. We have grown significantly in recent years, and have a challenging development plan for the next 5 years.

We are looking for air emissions technicians to join our expanding air monitoring teams in Ireland and the UK.

Ideally candidates should have a degree in science or engineering and a good understanding of air physics and chemistry. MCERTS air qualifications are also an advantage.

The person will be responsible for the following activities:

- Delivery of high quality services at all times
- Full understanding of the technical requirements of each project
- Communication with customer on project requirements
- Method statements, risk assessment and Site Specific Protocols
- Project timeline management
- Safety management
- Equipment and resources
- Stock and equipment maintenance
- Active development of services with sales team
- Development and training on new services

This is a full time position and is subject to a probationary period of 6 months.

Technicians will receive comprehensive training on all aspects of environmental air monitoring.

Apply in confidence to gfitz@fitzsci.ie.
