

Head of Research and Development

Headquartered in Drogheda, Co Louth, Fitz Scientific are a World Class monitoring and testing company.

We partner with our customers to provide world class testing and monitoring solutions to meet their global operational and regulatory requirements.

We innovate today, to lead tomorrow.

We are seeking to recruit a head researcher to lead our growing R&D team.

We are continually developing new methods in environmental and food testing and monitoring services. We have a pipeline of projects for the next 3 to 5 years and need to plan, manage and execute these projects.

What we are looking for:

You will have 5 to 10 years applied research experience.

You will have strong project and time management skills, be commercially aware, and have successfully executed complex projects within budget and on time.

You will have a relevant level 9 or 10 qualification.

You will be familiar and comfortable with a range of analytical techniques in chromatography, food chemistry and water chemistry.

You will be familiar with method validation techniques and the requirements of ISO 17025.

You will have excellent team leadership skills, and have the ability to coach and develop a growing team.

Please forward your CV in confidence to Geoff Fitzpatrick gfitz@fitzsci.ie by Fri 18 June 2021.
